STEAM Project at Gresham's – Tuesday 19th March

Dear Year 6 Parents and Carers,

Year 6 pupils are taking part in a science, technology engineering and maths project at the Dyson building at Gresham's School.

This is an event organised by Gresham's involving a number of local schools. The children will team up to undertake STEAM projects and activities. Gresham's teachers will set exciting and fun tasks for the participants, introducing them to new techniques and equipment whilst showcasing the power of STEAM and its impact in the world. Projects last year included building and racing a balloon powered car, programming robots to complete tasks, making electromagnets and building boats to hold as much mass as possible. All challenges are designed to be achievable in a short time period and encourage the students to think creatively and work together cooperatively. Every student involved will receive a medal for taking part.

We will be travelling by coach, leaving school at 1.15 and returning at 4.45.

Please give permission on Scopay for your child to attend.

Thank you for your support

Mrs P Kossowicz
